SALES - SERVICE - RENTAL

Remote Sensing and Mast-based Instrumentation

LiDAR Systems

stand-alone, trailer mounted and autonomous configurations

Doppler Wind LiDAR Systems

Scanning Doppler LiDARs

Aerosol & Cloud LiDARs

Visibility

Present Weather

Lightning

Detection / Location

Icing

Detection / Growth

Sensors and turn-key systems for almost every meteorological parameter and application based on 30+ years experience

Meteorological Sensors

Wind (Cup, Vane, 2D & 3D Sonic, Propeller, Wind Monitor)

Temperature, Humidity

Barometric Pressure

Cloud Height

Precipitation

Radiation

Data Logger and Displays

Experts for Meteorological Systems & Sensors

Your task is our challenge!

WE MEASURE – YOU RELAX

GWU-Umwelttechnik has been supplying sensors and systems for wind, wind profile, and meteorology since 1986. A team of scientists and engineers offers a broad knowledge base that ensures you to get an optimum solution for almost all measurement tasks, including sensors, system integration, data storage and processing, as well as remote system access.

GWU delivers systems and supplies services such as field measurement campaigns and data processing.
